

Allianz Technology Trust PLC

Technology investing from the heart of the industry

Aim

The Trust's objective is to achieve long-term capital growth by investing principally in the equity securities of quoted technology companies on a worldwide basis.

Trust Benefits

The award-winning Allianz Technology Trust PLC offers investors access to the fast moving world of technology with the reassurance that investment decisions are made by Walter Price who has over 45 years of experience of investing in technology. He is Co-Head of the AllianzGI Global Technology Team which currently manages \$12bn in assets under management.

At the Heart of the Industry

Allianz Technology Trust is managed by the highly experienced AllianzGI Global Technology team based in San Francisco. The team benefits from its close proximity to Silicon Valley where many of the world's key technology companies are headquartered.

Premium/-Discount
-10.7%

Share Price is the price of a single ordinary share, as determined by the stock market. The price shown above is the mid-market price.

Net Asset Value (NAV) per Share is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities. An undiluted, cum-income NAV is shown.

Premium/Discount. Since investment company shares are traded on a stock market, the share price that you get may be higher or lower than the NAV. The difference is known as a discount or premium.

Fund Manager's Review

Portfolio Overview

The Allianz Technology Trust's NAV total return was -8.3% in May, underperforming the Dow Jones World Technology Index return of -1.8%. During the month, stock selection and industry allocation detracted from relative performance.

Our position in ON Semiconductor was the top relative contributor. The company's chip solutions are used in power and data management applications with key end markets being the automotive, industrial, and communications segments. Shares gained after the company reported solid quarterly results with revenues and profit margins beating expectations. Management noted customer demand remains robust and supports their mid-term revenue outlook. Profits continue to be supported by ON's pivot to higher-value products and manufacturing efficiencies. We maintain our portfolio investment case on the company as we believe the more focused company could realise a higher earnings power and valuation over time.

Our underweight position in Apple was also a top relative contributor as mega-cap tech shares, which had been relative outperformers through the market turbulence, succumbed to selling pressures amid a spate of mixed earnings results and headlines. The company's most recent quarterly financial results beat expectations for revenue and earnings. iPhone revenues were better than expected despite the geopolitical disruptions, supply chain challenges, and COVID-19 impacts. We believe Apple is well-positioned to continue to benefit from the 5G upgrade cycle and growth in higher-margin services revenue from its expanding installed

“ Apple remains one of the largest positions in the portfolio but continues to be underweight relative to the benchmark's large position

base. Apple remains one of the largest positions in the portfolio but continues to be underweight relative to the benchmark's large position.

Other top active contributors included overweight positions in Micron, Infineon, and AspenTech.

Our position in cloud security company Zscaler was a top relative detractor as growth software stocks sold off at the beginning of the month. Later in the period, the company reported quarterly financial results that exceeded expectations driven by billings growth of 54% year-on-year. In terms of our investment case, despite the volatile market environment, we believe the company remains well-positioned to produce attractive long-term growth. Zscaler is a first mover in cloud security that has essentially created a new market in the cyber security world with an innovative product umbrella and strategic focus, which has the potential to disrupt the competitive landscape for years to come.

Our position in security software vendor, CrowdStrike, was also a top relative detractor amid the growth software sell-off. The company is emerging as a leader in the next-generation endpoint security market. CrowdStrike achieved better than expected revenues and profits in the

Walter Price CFA, Portfolio Manager

Allianz Technology Trust PLC is managed by Walter Price who is a Managing Director and Co-Head of the AllianzGI Technology Team in San Francisco, having joined in 1974. Walter is a current Director and past president of the M.I.T. Club of Northern California. He also heads the Educational Council for M.I.T. in the Bay Area and is a past Chairman of the AIMR Committee on Corporate Reporting for the computer and electronics industries.

most recent quarter driven by strong momentum in new client sales and growth with current customers. Management's guidance suggested strong growth and profitability would persist for the current fiscal year. We continue to believe CrowdStrike's endpoint security solutions are particularly relevant in the new distributed workforce context that many enterprises find themselves in today.

Other top active detractors included overweight positions in Lyft, Tesla, and MongoDB.

Market Outlook

In our view, the technology sector continues to benefit from strong tailwinds which, we believe, should continue to drive attractive long term appreciation. There is no question in our minds that the COVID-19 crisis will spur the use of technology and change how we live and work in the future. Additionally, many businesses are struggling to find workers to meet customer demand and need technology solutions to improve productivity of limited staffs. As companies need to reduce costs and improve productivity, we expect to see accelerating demand for innovative and more productive solutions such as cloud, software-as-a-service, artificial intelligence, cyber security, etc. We are in a period of rapid change, where the importance of technology is key to the prosperity of most industries. We believe that this environment is likely to provide attractive growth opportunities in many technology stocks over the next several years.

We continue to believe the technology sector can provide some of the best absolute and relative return opportunities in the equity markets – especially for bottom-up stock pickers.

Performance Track Record

Five Year Performance (%)

Risk & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market.

Competition among technology companies may result in aggressive pricing of their products and services, which may affect the profitability of the companies in which the Trust invests. In addition, because of the rapid pace of technological development, products or services developed by these companies may become rapidly obsolete or have relatively short product cycles. This may have the effect of making the Trust's returns more volatile than the returns of a fund that does not invest in similarly related companies.

Derivatives can be used to manage the Trust efficiently.

Cumulative Returns (%)
